

# 68

# DAYS.

Then the EU AI Act stops asking nicely.

**SWIPE → WHAT EUROPEAN ENTERPRISES MUST PROVE BY 2 AUGUST**

# THE NUMBERS EUROPE'S BOARDS CANNOT MISREAD.

**88%**

Of enterprises now using AI.

**15%**

Consider themselves ready to  
deploy Agentic AI in production.

**+55%**

Year-on-year increase in  
documented AI incidents.

# THIS IS NOT A TRUST CRISIS.

# IT IS A CRISIS OF OPERATIONAL EVIDENCE.

## SYMBOLIC TRUST

**"The model is safe."**

Surveys.

Marketing claims.

Sentiment.

## OPERATIONAL TRUST

**"Here is the audit  
log."**

Articles.

Evidence.

Artefacts.

## THE QUESTION THAT MATTERS IN 2026

*Can we demonstrate, under audit, that the Agentic AI we deployed does what we said it does, and produces evidence for every individual decision over a defined retention period?*

---

For CFOs. CTOs. CHROs. Of every European mid-market enterprise.

ON 2 AUGUST 2026

# FOUR ARTICLES BECOME ENFORCEABLE.

## Article 14

Human oversight that can refuse and reverse.

## Article 19

Automatic logs for every decision.

## Article 26.6

Logs retained for a minimum of 6 months.

## Article 73

Mandatory serious-incident reporting.

# OPERATIONAL TRUST IS NOT A POSITION.

*It is a set of four  
auditable artefacts.*

All four are required. Any vendor that cannot deliver all four is, by August, below the regulatory floor.

# THE 4 COMPONENTS OF OPERATIONAL TRUST.

## 01 — INCIDENT REPORTING

**Detection & notification mechanisms.**

For every Agentic AI deployment, in line with Article 73.

## 02 — REPRODUCIBLE BENCHMARKS

**Evidence over marketing.**

ISO 42001 over "our model is safe."

## 03 — OPERATIONAL TRACEABILITY

**Every decision reconstructable.**

Inputs, outputs, human intervention, basis.

## 04 — COMPETENT OVERSIGHT

**Flow, not signature.**

UX, not checkbox. Engineered into the path.

---

**AUDITABLE · CONTRACTABLE · COMPARABLE**

# WHAT ENTERPRISE BUYERS ARE ACTUALLY LOOKING FOR.

**86%**

of data leaders rate  
platform extensibility &  
interoperability as  
**critical** for AI decisions.

They are not buying monolithic AI products. They are buying orchestration layers that integrate with the enterprise systems already in place — **without replacing them.**

# BUILT FOR OPERATIONAL EVIDENCE. BY DESIGN.

The Agentic AI orchestration layer for European enterprise transformation.

## EUROPEAN SOVEREIGN INFRA

Data never leaves EU jurisdiction.

## APPROVAL GATES

Article 14, engineered into every flow.

## AUDITABLE TRACEABILITY

Every recommendation, decision and override logged.

## COMPLIANCE ROADMAP

ISO 27001 · ISO 42001 · SOC 2  
· GDPR
