

THE EU AI ACT DEADLINES MOVED.

The obligations didn't

€35M fines. New 2027 deadlines. Stricter governance. Most enterprises still aren't ready.

WHAT CHANGED · MAY 2026

THE DIGITAL OMNIBUS RESHAPES THE AI ACT.

On **7 May 2026**, EU institutions agreed a simplification package that resets the operating posture for every company running AI in Europe.

DEADLINES · PUSHED

High-risk obligations slide to **December 2027** and **August 2028** — more prep time, same stringent rules.

PROHIBITION · ADDED

New explicit ban on AI generating **non-consensual intimate content**.

TRANSPARENCY · TIGHTENED

Rules for AI-generated content applicable **December 2026**.

IN SCOPE · MID-MARKET ENTERPRISE

NOT JUST BIG TECH'S PROBLEM.

The AI Act applies to your company if any of these are true.

You deploy AI in HR, finance, credit, or workforce decisions.

You use chatbots, copilots, or generative tools with customers or employees.

Your AI processes EU citizens' data — regardless of where you're based.

**If your transformation roadmap touches AI,
you're in scope.**

THE 4 RISK LEVELS

WHERE DOES YOUR AI SIT?

Prohibited

Social scoring · manipulative systems · intimate deepfakes

High-risk

HR screening · credit scoring · worker monitoring · critical infrastructure

Limited-risk

Chatbots · emotion recognition · generative content

Minimal-risk

Most analytics · spam filters · basic recommenders

Most enterprise transformation tools land in High Risk

That's where the obligations get serious.

WHAT "COMPLIANT AGENTIC AI" DEMANDS

FIVE NON-NEGOTIABLES FOR HIGH-RISK AI UNDER THE ACT.

For high-risk systems, deployers must guarantee:

Risk management
& data governance

Human Oversight
at every decision point

Technical documentation
& full audit logs

Robustness & security
transparency by design

EU data sovereignty
& GDPR alignment

Bolting this onto disconnected tools after the fact?

That's where transformation budgets quietly bleed out.

THE ORCHESTRATION PROBLEM

DISCONNECTED AI FAILS THE AI ACT.

VENDOR A

HR screening

Own logs · own oversight

VENDOR B

Process automation

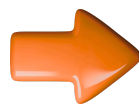

Own logs · own oversight

VENDOR C

Finance copilot

Own logs · own oversight

VENDOR SPRAWL

COMPLIANCE IMPOSSIBLE

The AI Act doesn't care about your vendor sprawl.

You are accountable as the deployer.

GOVERNANCE, BAKED IN

AGENTIC AI, BUILT FOR THE AI ACT FROM DAY ONE.

Without replacing the tools you already use.

EU-hosted

Data never leaves EU jurisdiction.

Compliant by design

GDPR · SOC 2 · ISO 27001 · ISO 42001.

Human-in-the-loop

Oversight on every Agentic AI decision.

Audit-ready

Logs, documentation, oversight by design.

One platform. All transformation.

One compliance posture.

THE NEXT 24 MONTHS

TRANSFORMATION STRATEGY MEETS EU READINESS.

The companies that win the next 24 months won't be the ones using **the most AI**.

They'll be the ones using it with the **strongest governance**.
